nine twothree

FOR UTILITY AND ENERGY SERVICES CONTRACTORS

Keep your systems. Own the intelligence.

Your accounting system knows what every job cost. Your people know why. NineTwoThree builds the layer that connects them across every company you run, inside your own Microsoft tenant, and you own every line of it.

WHAT YOU GET

1 · Every job's margin before the month closes

One review across every company. Jobs that break a margin rule get flagged mid-month.

No AI inside, by design.

2 · The right answer for whoever's asking

Live balances and policy answers by company, role, union and location, inside the Microsoft sign-in people already have.

3 · One question across every company, with the source rows attached

The owner asks once, across billing, payroll, the job tracker and the approved month-end numbers.

What we build, not a case result.

4 · Your IT team runs your systems. We bring the AI.

A managed-outcome contract: a fixed monthly fee, and we carry the delivery risk. We train your engineer to take it over.

150+ AI projects delivered since 2012.

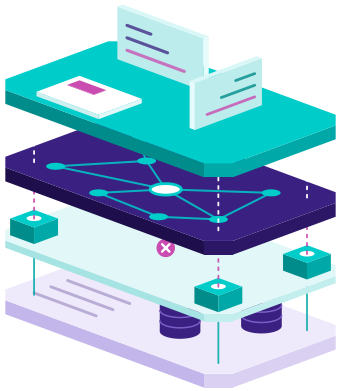

HOW THE AI ANSWERS

AI can't use data it can't connect

The graph. The Company Map's semantic graph model links each job to its POs, invoices, cost lines, crews and company.

The walk. The AI fixes the scope, follows the links to the approved numbers and applies your rules. Same path every time.

The gateway. We build it so the AI never writes database code.

AI models
Swappable, not trained on your data

Where work happens
WIP review, Employee Answers, the Owner's View, Teams

Company Map YOURS
The semantic graph and your rules, tested

Governed gateway
Named actions only, run as the person asking

Your systems
Accounting system, Power BI, SharePoint, Entra ID. Unchanged.

HOW WE BUILD YOUR HARNESS

WEEKS 1 TO 4
Map where answers live
Harness sessions with your people. You keep Company Map v1.

WEEKS 5 TO 8
Prove it on your data
A pilot scored on your real questions, plus a build plan.

MONTHS 3 TO 6
Put it in front of people
Live company by company, with Entra permissions.

ONGOING
Keep it right
Re-tested after every change, then handed over.

What you own

- The code, in your repositories from day one
- The Company Map, prompts and evaluations
- Logs and traces of every request

No licence fee and no token markup. You pay model providers directly.

Next to the AI you already pay for

Use Copilot and your vendors' AI for the standard work, like email, documents and questions about one report. Bring NineTwoThree for what only your companies know.

SECURITY AND IT REVIEW

Ready for IT review from day one

Runs in your Microsoft tenant

Your Azure subscription and your repositories. Read-only to your accounting system.

Permissions from Entra

Security groups map each person to company, role and union. Power BI row-level security applies to every query.

SOC 2 Type II compliant development

Every request traced and logged. Models under business terms that exclude training on your data.

The Who's Asking Test

50 real questions, each asked as six people. Your HR and accounting leads score answer and scope. A correct answer that shows too much fails. Results are published only when complete and approved. None have finished yet.

NINETWOTHREE

2012
building AI that people use

150+
AI projects delivered

97%
project success rate

24/27
recent projects with positive ROI

We're an AI company, not a software consultancy. Published work: Amerit Fleet (90% reduction in average error detection time) and Wheels Now (order processing from days to minutes).

Book a Job Trace

Pick one job. In 45 minutes we trace where its cost, crew hours and month-end review live, and tell you honestly what's worth building. ninetwothree.co
