nine twothree

FOR MANUFACTURERS RUNNING INFOR SYTELINE

Keep Infor. Own the intelligence.

Your ERP knows what happened. Your people know why. NineTwoThree builds the layer that connects them, and you own every line of it.

WHAT WE HEAR ON SHOP FLOORS

PLANT MANAGER
"We find out a job is late when the truck is already waiting."

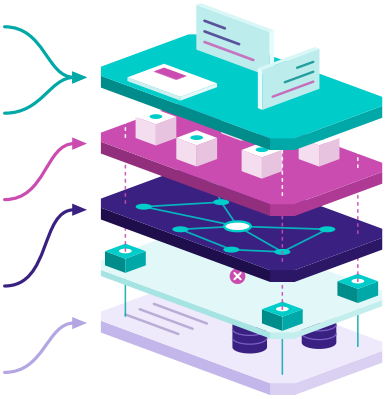

CONTROLLER
"A simple margin question takes three days and two exports."

CEO
"Our best estimator retires in the spring."

WHAT YOU GET, AND WHERE IT LIVES

AI on the SyteLine you run today

- **Plain-English answers** with the source rows attached
- **Reports by asking,** plus a morning brief before the shift
- **Agents that do the chasing:** late jobs, revisions, supplier risk
- **An AI team that builds on SyteLine,** alongside your Infor partner
- **Start now.** On-prem or cloud SyteLine, with a pilot on your data by week 8

AI models
Plug into the Shop Map. Swappable, never trained on your data.

Shop views
Command center, answers with sources

Shop agents
Bounded actions, approval gates, audit log

Shop Map YOURS
Semantic graph, your rules, proof

Governed gateway
The AI never writes database code

Infor SyteLine
System of record, unchanged

HOW WE BUILD YOUR SHOP HARNESS

WEEKS 1 TO 4	WEEKS 5 TO 8	MONTHS 3 TO 6	ONGOING
Walk the floor	**Prove it on your data**	**Put it on the floor**	**Keep it learning**
Your people show us where every answer lives.	A working pilot scored on your real questions.	Views and agents in production, permissions from your Infor roles.	Every correction becomes a rule. Each SyteLine release tested first.
Shop Map v1 + Shop AI Rules	**Pilot, scorecard**, fixed-price plan	**Code,** prompts, models, evaluations	**A Shop Map** worth more every month

YOURS TO KEEP

The Shop Map

Yours

ORDER CO 1063 → JOB Job 5063 → OPERATION Op 40 brake → MACHINE Press brake → SHIPMENT BOL 7731

RULE · FROM THE SCHEDULER Hot-list jobs jump the queue at the press brake

A semantic graph model of how every record in your shop connects, with your people's rules and proof on top. It survives retirements, upgrades and the move to CloudSuite. Illustrative records.

SECURITY AND COMPLIANCE

Ready for IT review from day one

Inherits your SSO and SyteLine role-based access

If someone can't open it in SyteLine, the AI won't show it to them.

You choose where it runs

On-prem, your own AWS or Azure account, or a dedicated environment NineTwoThree manages.

SOC 2 Type II compliant development

Every answer and agent action is logged, with least-privilege access.

YOUR INFOR PARTNER RUNS THE ERP. WE BRING THE AI.

Keep the core clean

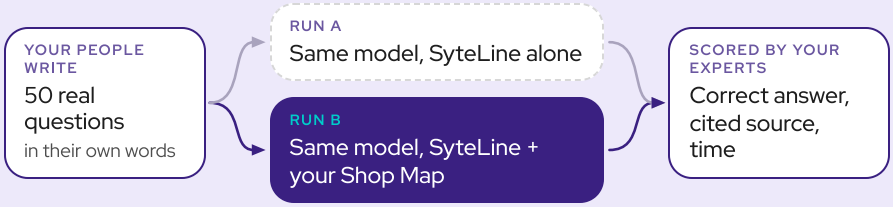

NineTwoThree is an AI company, not an ERP consultancy. We read and act through ION, Mongoose IDOs and the Data Lake. Your partner, MES and data collection stay.

What we're building on SyteLine

In a customer's SyteLine test environment, our layer reads and writes through Infor's own APIs, with every action approved and logged.

The Shop Context Test

First results in progress

Only the Shop Map changes between runs. Results are published only when complete and approved.

Who owns what

You own the code, prompts, Shop Map, evaluations and any models trained on your data.
